PROFILE

Frontend Developer with 6+ years of experience in React and TypeScript, specialized in taking full ownership of the frontend: from application architecture to the design system that supports it. I design and build reusable component libraries, and over the past few years I've incorporated AI tools (such as Claude Code) into both development and screen design, speeding up the path from idea to finished product.

TECHNICAL SKILLS

React, TypeScript, JavaScript, Next.js, Ant Design, Material UI, Styled Components, CSS Modules, React Hook Form, Formik, React Query, SWR, Axios, Zod, GraphQL, Refine, Vite, Storybook, React Testing Library, ahooks, i18n, Figma, Claude Code.

PROFESSIONAL EXPERIENCE

Software Developer • Avenida+ *(marketplace infrastructure for banks and fintechs)*

Apr 2025 - Present | Remote

- Sole frontend owner of "Universo de Sellers," the platform that manages onboarding for every new seller joining Avenida, currently in its production launch phase. Stack: React, Ant Design, React Hook Form.
- Structured the application from scratch, defining the folder architecture and applying the container-presentational pattern to separate business logic from presentation.
- Made frontend-level product and project decisions: defined priorities, feature scope, and UI/UX criteria together with the internal team.
- Designed the platform's screens from scratch with AI tool support, defining the visual and color system, including light and dark mode support.
- Designed and implemented reusable components (file uploads, expandable-row tables, status chips, among others).
- Integrated Claude Code into the daily workflow, both for code implementation and screen design.

Frontend Developer (Freelance) • DynamicUs Tech *(freelance development consultancy)*

Nov 2023 - Sept 2025 | Remote

- Built the complete frontend for a backoffice application for the Colegio de Abogados de La Plata (La Plata Bar Association): registration management, viewing lawyers' records and documentation, and fee payment collection via Mercado Pago integration.
- Took over as sole frontend owner of the project, after initially being part of a three-person frontend team.
- Worked closely with the backend team to define data flows and architecture.
- Stack: Refine, React, TypeScript, Ant Design, Styled Components, Axios, ahooks.

Frontend Developer • Henry *(well-known coding bootcamp in Latin America)*

Nov 2021 - Jan 2025 | Remote

- Responsible for implementing and maintaining key features in Henry's application, using React, Next, TypeScript, MDBootstrap, Ant Design, Formik, React Final Form, Axios, and SWR.
- Built the internal staff backoffice: student list management, grades, and study material creation.
- Wrote automated tests with React Testing Library to ensure code quality and stability.
- Worked closely with the backend team to plan data models and with design to ensure a consistent user experience.
- Contributed to building Henry's component library from scratch, using Storybook, React, and CSS Modules, adopted across all of the company's applications.

Frontend Developer • Increase *(Latin American fintech for payment collection management)*

Aug 2020 - Nov 2021 | Remote

- Developed and maintained "Platform," the application that centralizes user access to Increase's products, using React, TypeScript, GraphQL, Styled Components, Formik, Axios, and CSS.

- Improved user experience through intuitive, responsive interfaces, with a focus on accessibility.
- Collaborated on continuous improvement of applications, aligned with business needs.

Web Developer (Freelance) • Mono! Diseño gráfico e Ilustración

Apr 2020 - Oct 2021 | Remote

- Developed and built websites, including landing pages and admin dashboards, using HTML, CSS, and JavaScript, ensuring performance, accessibility, and responsive design.
- Worked directly with a graphic designer, turning visual concepts into functional, engaging web interfaces.
- Owned the full technical build, from initial structure to final delivery of the website.

VOLUNTEERING

Full Stack Teaching Assistant • Henry Bootcamp

Jul 2020 - Aug 2020 | Academic experience

Supported lectures and workshops, explaining core JavaScript concepts and other web development technologies.

- Coordinated a group of students to help them integrate into the study team.
- Assisted with JavaScript, React, and Node exercises, promoting group collaboration (Pair Programming).

EDUCATION

- Full Stack Web Developer. Henry Bootcamp. 2020. Completed.

LANGUAGES

- Spanish: Native.
- English: Technical English — fluent reading/writing. Conversational: B1.
